

BRUCE LANGSON (Class of 1965)

Bruce has served as Vice President of the LVHS Alumni Association since it began in 2008. He has made significant contributions to the LVHSAA. He is the **designer** (and builder - with the help of numerous other alumni) of the Wildcat float! He is in charge of the Mentoring, Vehicle Donation and Grant programs for the LVHSAA and was honored as "Alumni of the Year" at the 2011 Wildcat Reunion.

Bruce was born in Montebello, California and is married (for 42 years!) to Cathy J. Davis. They have two children, a son, Ryan, and a daughter, Nicole, plus five grandchildren. Bruce was part of a family whose goals were directed primarily toward construction and real estate development. He continuously remained active in that family business from 1967 to present while also creating his own construction and development/management companies. His grandfather and father were general contractors and developers in California, Nevada and Texas. Bruce is also a general contractor and has assisted and been in charge of the design, building, operations, and management of various types of commercial properties that the family business developed and built. Those projects include multi-family, single family and town-home developments, commercial and industrial properties. He currently owns, manages and/or has built apartment complexes in Northern and Southern Nevada.

Bruce was granted a patent in 1987 for his original idea concerning the manufacture of photocopy exact duplication of artificial rock formations. The results are used in hotels, amusement parks, zoos, and other areas throughout the world that require realistic rock and water features. As a contractor or consultant, he has designed and/or built award winning naturalistic exhibits and water features around the globe. Bruce was recently granted two patents concerning the RV industry. He has served on American Concrete Institute's

(ACI) Committees for 15 years. His reputation through the ACI and The Gunitite Company has led to the demand of his consultation services from numerous owners and contractors, primarily assisting them in avoiding or overcoming problems that they encounter in their construction projects. Langson has been licensed as a general contractor in Colorado, Florida, Louisiana, Mississippi, Oregon, Texas, West Virginia and Hawaii.
